Life Science

Your partner for life science

Stringent requirements for reliability, safety and purity with highest performance and accuracy. Life science products are diverse and must fulfill a wide variety of functions. Whether medical or laboratory technology, our experts know the right components for your application.

Your advantages

- 1 Compact, low dead space design**
- 2 High thermal, chemical and mechanical resistance**
- 3 More cleanliness and safety due to clean room assembly**
- 4 Certified quality**
- 5 Customized solutions**

Connecting

Push-in and push-on fittings, tubes, non-return valves and couplings

Controlling

Pressure relief, dispensing and solenoid valves, function fittings

We master demanding tasks

Absolute sterility – safe steam sterilization of medical devices

As the safest process for medical devices, steam sterilization ensures absolute sterility. Our life science products impress here with high temperature resistance and robustness.

Perfectly dosed – it all depends on the right quantity

Whether drinking water, rinsing systems or cooling systems – liquids are an important aid in the dental sector. Our life science components ensure the exact dosage.

Clean mounted – PURE fittings for ventilators

More resilience and patient protection. AVS Römer PURE components are perfect for oxygen systems and applications with medical gases, such as in intensive care ventilators.

Measuring

Conductivity, pressure and temperature sensors

Transferring

External gear pumps
